

INTERNOISE 2016
DYNAMAP SPECIAL SESSION II
HAMBURG AUGUST 24, 2016
Hall A2

Program

- 10:20 LIFE DYNAMAP: an overview of the project after two years working
P. Bellucci (Chair)
- 10:40 Milan dynamic noise mapping from few monitoring stations: statistical analysis on road networks
Giovanni Zambon (Chair)
- 11:00 Identification of failure markers in low cost noise measurement devices
Luca Nencini
- 11:20 Analysis and automatic detection of anomalous noise events in real recordings of road traffic noise for the LIFE DYNAMAP project
Joan Claudi Socoró
- 11:40 Development of a GIS based software for real time noise maps update
Andrea Cerniglia
- 12:00 **Lunch break**
- 13:00 Basic noise maps calculation in Milan pilot area
Paola Coppi/Simone Radaelli
- 13:20 Implementing the Dynamap system in the suburban area of Rome
Laura Peruzzi

Invited papers

- 13:40 Noise Monitoring Leeuwarden Air Force Base
Nico Faber
- 14:00 Source-selective noise monitoring pilot project in Birmingham city
Gábor Geréb

Panel Discussion

- 14:20 Dynamap future development
Rosa Maria Alsina Pagès (chair)

End of the Session
